

INDEX METHODOLOGY

# NASDAQ RISKALYZE US LARGE CAP SELECT DIVIDEND INDEX

## NQRSKUSLD

### INDEX DESCRIPTION

The Nasdaq Riskalyze US Large Cap Select Dividend Index seeks to create a diversified portfolio of dividend-paying securities with above average yield.

### SECURITY ELIGIBILITY CRITERIA

#### Parent index

A security must be a component of the Nasdaq US 500 Large Cap Index (NQUS500LC) on the Index Reconstitution Reference Date.

#### Multiple classes of securities

One security per issuer is permitted. If an issuer has multiple listed security classes, the security with the highest three-month average daily traded value generally is considered for inclusion in the Index.

If a current Index Security meets all criteria for Index Inclusion, the security may remain in the Index even when another security issued by the same issuer has a higher average daily traded value.

#### Other eligibility criteria

An issuer must have paid an eligible dividend in the trailing twelve-month period, as determined by the ex-date.

An issuer must have a trailing twelve-month dividend yield higher than the index yield of NQUS500LC.

If, at reconstitution, Nasdaq becomes aware that an issuer or security will soon undergo a fundamental change that makes it ineligible, Nasdaq will remove the security from consideration. This includes entering into a definitive merger or acquisition agreement or other pending arrangement that would make it ineligible for Index inclusion, or a filing of bankruptcy or similar protection from creditors.

## INDEX CALENDAR

### Reconstitution schedule

The Index Reconstitution is conducted quarterly in January, April, July and October.

### Reconstitution reference dates

The Security Eligibility Criteria are applied using market data as of the month-end before the effective date (December, March, June and September respectively).

### Reconstitution announcement dates

Index Reconstitutions are announced in early January, April, July and October.

### Reconstitution effective dates

Index Reconstitutions are effective at market open on the first trading day after the third Friday in January, April, July and October.

### Rebalance schedule

The Index is rebalanced quarterly in conjunction with the Index Reconstitution. The reference, announcement, and effective dates are the same as those of the Reconstitution.

## CONSTITUENT SELECTION

### Constituent selection process

Securities that meet the applicable Security Eligibility Criteria are included in the Index.

## CONSTITUENT WEIGHTING

### Constituent weighting scheme

The Index is a modified dividend yield-weighted index.

### Constituent weighting process

The Index employs a two-level weight adjustment scheme.

Securities are classified at their Industry level as defined by the Industry Classification Benchmark (ICB), a product of FTSE International Limited that is licensed for this use. The weight of each Industry in the

Index is assigned to be equal to the aggregate market value of the Industry in NQUS500LC divided by the aggregate NQUS500LC market value of all Industries represented in the Index.

The weight of each Index Security is assigned to be equal to the security's dividend yield divided by the sum of all dividend yields of Index Securities within its Industry, multiplied by its Industry's assigned weight.

## INDEX MAINTENANCE

### Deletion policy

If, at any time during the year other than the Index Reconstitution(s), an Index Security no longer meets the Eligibility Criteria, or is otherwise determined to have become ineligible for inclusion in the Index, it is removed from the Index. This includes circumstances where an Index Security is determined to be ineligible for continued inclusion in the Index due to bankruptcy, delisting, or a definitive agreement that would likely result in the security no longer being Index eligible. Please refer to **Nasdaq's Corporate Actions and Events Manual – Equities** for detailed handling of the aforementioned event types.

### Replacement policy

Index securities deleted at any time during the year other than the Index Reconstitution(s) are not replaced.

### Corporate actions

In the interim periods between scheduled index reconstitution events, individual Index securities may be subject to a variety of corporate actions and events that require maintenance and adjustments to the Index. Specific treatment of each type of corporate action or event is described in **Nasdaq Corporate Actions and Events Manual – Equities**, which is incorporated herein by reference.

In certain cases, corporate actions and events are handled according to the weighting scheme or other index construction techniques employed. Wherever alternate methods are described, the Index will follow the "Non-Market Cap Corporate Action Method."

### Index share adjustments

Other than as a direct result of corporate actions, the index does not normally experience share adjustments between scheduled index rebalance and reconstitution events.
