

## Nasdaq US Large Cap Equities for Rising Rates Index

The Nasdaq US Large Cap Equities for Rising Rates Index (NQERR) consists of 50 U.S. securities whose stock prices have historically exhibited relatively high correlation to movements in interest rates. The Index identifies five sectors within the Nasdaq US 500 Large Cap Index that have the highest correlation to weekly changes in 10-year U.S. Treasury yields and then selects the top ten stocks in each of these sectors that have the highest correlation of relative performance (versus the Nasdaq US 500 Large Cap Index) to changes in the 10-Year yield. The #1 ranked sector is given a weight of 30%, #2-25%, #3-20%, #4-15% and #5-10%. The 50 securities selected for the Index are assigned an equal weight within their respective sector. The Index is designed to outperform traditional U.S. large-cap equities. More information about the Index can be found at <https://indexes.nasdaq.com/Index/Overview/NQERR>
