

INDEX METHODOLOGY

NASDAQ SPROTT LITHIUM MINERS™ INDEX

NSLITP™

INDEX DESCRIPTION

The Nasdaq Sprott Lithium Miners Index is designed to track the performance of a selection of global securities in the lithium industry. Lithium is a raw material that is essential to the transition to a less carbon-intensive economy. Lithium is critical for the energy transition from fossil fuels to cleaner energy sources and technologies, and for the purpose of this index include major lithium producers, developers, and explorers.

SECURITY ELIGIBILITY CRITERIA

To qualify for index inclusion, securities must meet the following Security Eligibility Criteria, which are applied as of the Reconstitution reference date.

Security types

A security must be classified as a common stock or depositary receipt. References to the “issuer” of a depositary receipt are references to the issuer of the underlying security.

Multiple securities per issuer

One security per issuer is permitted. If an issuer has multiple otherwise-eligible securities, one of which is an Index Security as of the Reconstitution reference date, only that Index Security may be eligible; otherwise, only the security with the highest three-month average daily value traded (ADVT) may be eligible.

Listing Exchanges

A security must be listed on an eligible exchange named in Appendix A.

Industries and sectors

A security's issuer must be classified by Sprott as a Lithium Producer, Developer, or Explorer. Classification is based on the definitions below. All references to "revenue" are references to gross revenue as reported in a company's most recent available audited financial statements.

- **Producers:** companies that extract lithium and that have a significant percentage of their revenue tied to the sale of lithium.
- **Developers:** companies that have the majority of their operations related to preparing mines for lithium production.
- **Explorers:** companies that have the majority of their operations related to searching for lithium.

Additionally, a security's issuer must have an Intensity Score of at least 25%. The Intensity Score for securities with revenue and for which revenue is deemed to be an appropriate characteristic is the percentage of their revenue attributable to the aforementioned strategy of this Index. For securities without revenue or for which revenue is an inappropriate characteristic, the Intensity Score is given at 50%. Issuers without revenue or for which revenue is an inappropriate characteristic may include, but is not limited to, junior mining companies involved in the development and exploration of lithium.

Market capitalization

A security not in the Index as of the Reconstitution reference date must have a free float market capitalization of at least \$40 million (USD).

A security in the Index as of the Reconstitution reference date must have a free float market capitalization of at least \$25 million (USD).

Seasoning

To be eligible for initial index inclusion, a security must have been listed and available for trading on an eligible exchange for at least three full calendar months, not including the month of initial listing. For seasoning purposes, eligible exchanges include those named in Appendix A. The seasoning eligibility is determined as of the Reconstitution reference date and includes that month.

For example, to be considered for inclusion at the June Reconstitution, a security must have been listed and available for trading on an eligible exchange no later than the last trading day of February, with seasoning occurring over the months March, April, and May.

Any security that is already a member of the Index, including those added as the result of a spin-off event, will be exempt from the seasoning requirement.

Liquidity

A security not in the Index as of the Reconstitution reference date must have a three-month ADVT of at least \$100,000 (USD).

A security in the Index as of the Reconstitution reference date must have a three-month ADVT of at least \$50,000 (USD).

Other eligibility

If, at reconstitution, Nasdaq becomes aware that an issuer or security will soon undergo a fundamental change that makes it ineligible, Nasdaq will remove the security from consideration. This includes entering into a definitive merger or acquisition agreement or other pending arrangement that would make it ineligible for index inclusion, or a filing of bankruptcy or similar protection from creditors, or other events as described in Section 3 of **Corporate Actions and Events Manual – Equities**.

CONSTITUENT SELECTION

An Index Reconstitution is conducted semiannually based on the Reconstitution reference date.

Every security that meets all applicable *Security Eligibility Criteria* is selected for inclusion in the Index.

CONSTITUENT WEIGHTING

Constituent weighting scheme

The Index is a modified theme-adjusted free float market capitalization-weighted index.

Constituent weighting process

An Index Rebalance is conducted semiannually based on the Rebalance reference date.

Theme-Adjusted Free Float Market Value

A Theme-Adjusted Free Float Market Value is calculated for each Index Security as the product of the Index Security's free float market capitalization and its issuing company's theme adjustment factor.

- For a company with an Intensity Score greater than or equal to 50%, its theme adjustment factor is 100%.
- For a company with an Intensity Score greater than or equal to 25% and less than 50%, its theme adjustment factor is equal to its Intensity Score.

Weight Calculation

Each Index Security's initial weight is determined by dividing its Theme-Adjusted Free Float Market Value by the aggregate Theme-Adjusted Free Float Market Value of all Index Securities.

Initial weights are then adjusted to meet the following constraints:

- For each security with an initial weight less than 0.3%, set its weight to 0.3%.
- For each security in the top 5 by initial weight, set its maximum weight to 9.75%.
- For each security with an initial weight greater than 0.3% and not in the top 5 by initial weight, set its weight to be greater than 0.3% and less than or equal to 4.75%.
- In the event that the sum of securities' weights with Intensity Scores greater than or equal to 25% and less than 50% exceeds 15%, the sum of these securities' weights is set at 15%, with individual securities' weights distributed pro-rata based on their previous weights. The excess

weight is redistributed pro-rata to all securities that have not already reached a maximum-security weight threshold.

For additional information about index weighting, see **Nasdaq Index Weight Calculations**.

INDEX CALENDAR

Reconstitution & Rebalancing schedule

Reconstitution Frequency	Semiannually
Rebalance Frequency	Semiannually
Reconstitution Reference Dates	Last trading day of May and November, respectively
Reconstitution Announcement Dates	After the close on the sixth trading day prior to the Reconstitution effective date
Reconstitution Effective Dates	At market open on the first trading day after the third Friday in June and December, respectively
Rebalance Reference Dates	Same as Reconstitution reference dates
Rebalance Announcement Dates	Same as Reconstitution announcement dates
Rebalance Effective Dates	Same as Reconstitution effective dates

Holiday schedules

The Index is calculated Monday through Friday and does not close for holidays.

Index calculation and dissemination schedule

The Index Value is calculated five (5) days a week, Monday through Friday, once per second from the start of the trading day in Tokyo (09:00:01 Japan Standard Time) until the close of the trading day in New York (17:16:00 Eastern Time).

INDEX MAINTENANCE

Deletion policy

If, at any time other than an Index Reconstitution, Nasdaq determines that an Index Security has or will undergo a fundamental alteration that would make it ineligible for index inclusion, the Index Security is removed as soon as practicable. Such alternations may include a merger, acquisition or other major corporate event that would otherwise adversely affect the integrity of the Index.

Corporate actions

In the interim periods between scheduled index reconstitution and rebalancing events, individual Index securities may be the subject to a variety of corporate actions and events that require maintenance and adjustments to the Index. With the exception(s) noted below, specific treatment of each type of corporate action or event is described in **Nasdaq Corporate Actions and Events Manual – Equities**, which is incorporated herein by reference.

In certain cases, corporate actions and events are handled according to the weighting scheme or other index construction techniques employed. Wherever alternate methods are described, the Index will follow the “Non-Market Cap Corporate Action Method.”

Index share adjustments

Other than as a direct result of corporate actions, the Index does not normally experience share adjustments between scheduled Index rebalance and reconstitution events.

ADDITIONAL INFORMATION

Announcements

Nasdaq announces Index-related information via the Nasdaq Global Index Watch (GIW) website at <http://indexes.nasdaqomx.com>.

For more information on the general Index Announcement procedures, please refer to the **Nasdaq Index Methodology Guide**.

Unexpected market closures

For information on Unexpected Market Closures, please refer to the **Nasdaq Index Methodology Guide**.

Calculation types

For information on the Index calculation types as well as the mathematical approach used to calculate the Index(es), please refer to the **Nasdaq Index Policies & Procedures: Calculation Manual – Equities & Commodities**.

Recalculation and restatement policy

For information on the Recalculation and Restatement Policy, please refer to the **Nasdaq Index Recalculation Policy**.

Data sources

For information on data sources and the classification of dividends and associated tax rates, please refer to the **Nasdaq Index Methodology Guide**.

Contact information

For any questions regarding an Index, please contact the Nasdaq Index Client Services team at indexservices@nasdaq.com.

Index dissemination

Index values and weightings information are available through Nasdaq Global Index Watch (GIW) website at <https://indexes.nasdaqomx.com/> as well as the Nasdaq Global Index FlexFile Delivery Service (GIFFD) and Global Index Dissemination Services (GIDS). Similar to the GIDS offerings, Genium Consolidated Feed (GCF) provides real-time Index values and weightings for the Nordic Indexes.

For more detailed information regarding Index Dissemination, see the **Nasdaq Index Methodology Guide**.

Website

For further information, please refer to Nasdaq GIW website at <https://indexes.nasdaqomx.com/>.

FTP and dissemination service

Index values and weightings are available via FTP on the Nasdaq Global Indexes FlexFile Delivery Service (GIFFD). Index values are available via Nasdaq's Global Index Dissemination Services (GIDS).

GOVERNANCE

All Nasdaq Indexes are managed by the governance committee structure and have transparent governance, oversight, and accountability procedures for the Index determination process. For further details on the Index Methodology and Governance overlay, refer to the **Nasdaq Index Methodology Guide**.
