

INDEX METHODOLOGY

OMX HELSINKI 25 INDEX™

OMXH25

INDEX DESCRIPTION

The OMX Helsinki 25 Index measures the performance of a selection of the most traded securities listed on Nasdaq Helsinki Ltd.

SECURITY ELIGIBILITY CRITERIA

Parent index

A security must be included in the OMX Helsinki All-Share Index. Please refer to that methodology for further information.

Other eligibility criteria

The Issuer of a security not already in the Index as of the Index Reconstitution Reference Date ("non-Index Security") may not have entered into a definitive agreement or other arrangement that would likely result in the non-Index Security becoming ineligible.

The Issuer of a security already in the Index as of the Index Reconstitution Reference Date ("Index Security") that has entered into a definitive agreement or other arrangement that would likely result in the Index Security becoming ineligible soon after the Index Reconstitution Effective Date may be removed from the Index in conjunction with the Index Reconstitution.

INDEX CALENDAR

Reconstitution schedule

Nasdaq selects constituents semi-annually in February and August to determine the Index Securities as of the Index Reconstitution Effective Date.

Reconstitution reference dates

The February Reconstitution is conducted using data as of the end of December with the exception of free float data, which is as of the end of October.

The August Reconstitution is conducted using data as of the end of June, with the exception of free float data, which is as of the end of April.

Reconstitution announcement dates

Index Reconstitution changes are announced at least five (5) trading days prior to the Index Reconstitution Effective Date.

Reconstitution effective dates

Index Reconstitution changes become effective at market open on the first trading day in February and August.

Rebalance schedule

The Index is rebalanced quarterly in February, May, August and November, which two (2) times per year coincides with the Index Reconstitution in February and August.

Rebalance reference dates

When the Index Rebalance coincides with the Index Reconstitution, the Index Securities' weights are determined by the free float shares used in the Index Reconstitution and VWAP as of the day prior to the Index Rebalance Effective Date.

When the Index Rebalance does not coincide with the Index Reconstitution, the Index Securities' weights are determined by the free float shares used in the most recent Index Reconstitution, adjusted for corporate actions, and VWAP as of the day prior to the Index Rebalance Effective Date.

Rebalance announcement dates

Index Rebalance changes are announced only in conjunction with the Index Reconstitution at least five (5) trading days prior to the Index Rebalance Effective Date.

Rebalance effective dates

Index Rebalance changes become effective at market open on the first trading day in February, May, August and November, coinciding with the Index Reconstitution in February and August.

CONSTITUENT SELECTION

Constituent selection process

A Reconstitution is conducted on a semi-annual basis, at which time all eligible securities, ranked by Nasdaq official median daily turnover in Euro (EUR) during the six (6) calendar months starting six (6) calendar months prior to the Index Reconstitution Reference Date, are considered for inclusion in the Index based on the following criterion:

- The top 25 securities ranked by turnover are selected for inclusion in the Index.

CONSTITUENT WEIGHTING

Constituent weighting scheme

The Index is a modified free float market capitalization-weighted index.

Constituent weighting process

Index Securities' initial weights are determined by dividing each Index Security's free float market capitalization by the aggregate free float market capitalization of all Index Securities. Issuer weights are the aggregated weights of the Issuers' respective Index Securities.

Initial index weights are then adjusted to meet the following constraint:

- No issuer weight may exceed 10% of the Index.

For additional information about index weighting, see **Nasdaq Index Weight Adjustment Guidelines**.

INDEX MAINTENANCE

Deletion policy

If at any time other than an Index Reconstitution Nasdaq determines that an Index Security has or will undergo a fundamental alteration that would make it ineligible for Index inclusion, the Index Security is removed from the Index as soon as practicable as noted in the "Mergers & Acquisitions (M&A)" section of the **Corporate Actions and Events Manual—Nordics, Baltics, & SmartBeta Equities**.

Such fundamental alterations include, but are not limited to, a listing switch to an ineligible Index Exchange, acquisition of more than 90% of outstanding shares, merger, or other major corporate event that would otherwise adversely impact the integrity of the Index.

On the last trading day before the effective date of the deletion, other than due to bankruptcy, the calculation of the Index Value for that Index Security shall be based on VWAP. On the Effective Date of the deletion, the Index Security will be removed at VWAP. For more information on the handling of

bankrupt securities please refer to the “Bankruptcy” section of the **Corporate Actions and Events Manual—Nordics, Baltics, & SmartBeta Equities**.

Replacement policy

Removed securities are not replaced except, under certain conditions, when the removed Index Security is involved in a merger. Please refer to the “Mergers & Acquisitions (M&A)” section of the **Corporate Actions and Events Manual—Nordics, Baltics, & SmartBeta Equities** for further information.

Replacement securities are added at VWAP.

Addition policy

Under certain circumstances, a newly listed security may be added as an Index Security between Index Reconstitutions. Use of this "Fast Entry" procedure is invoked by Nasdaq Index Management Committee to protect the integrity of the Index.

Factors used to determine whether a security is added include the security's expected market capitalization and turnover.

If a security is deemed eligible for Fast Entry it will be added as an Index Security as soon as practicable. The Fast Entry security will be added to the Index at VWAP of the day prior to the Effective Date of the addition and the quarterly Constituent weighting process will be applied.

Any Index Security added via the Fast Entry procedure less than three (3) calendar months before the next Index Reconstitution will be included as an Index Security at the next Index Reconstitution. This may result in an Index Security count of more than twenty-five (25) Index Securities at the next Index Reconstitution.

Corporate actions

Information on corporate action and event handling can be found in the **Corporate Actions and Events Manual—Nordics, Baltics, & SmartBeta Equities**.

Unless otherwise noted and where possible, corporate actions are announced approximately two (2) days in advance.

The Index follows a "Market Cap Corporate Action Method for Indexes that Review Index Shares on a Periodic Basis", with the exceptions listed below.

Corporate action exceptions

In the "Adjustment for Issues - Basket Method and Fixed Price Method" section of the **Corporate Actions and Events Manual—Nordics, Baltics, & SmartBeta Equities**, the Basket method and the Fixed Price method use VWAP.

Index share adjustments

The Index follows a "Market Cap Corporate Action Method for Indexes that Review Index Shares on a Periodic Basis". Please refer to the "Index Share Adjustments" section of the **Corporate Actions and Events Manual—Nordics, Baltics, & SmartBeta Equities** for further information.

ADDITIONAL INFORMATION

Announcements

Nasdaq announces Index-related information via the Nasdaq Global Index Watch (GIW) website at <http://indexes.nasdaqomx.com>.

For more information on the general Index Announcement procedures, please refer to the **Nasdaq Index Methodology Guide**.

Holiday schedules

The Indexes are calculated Monday through Friday, except on days when Nasdaq Helsinki Ltd. is closed.

Unexpected market closures

For information on Unexpected Market Closures, please refer to the **Nasdaq Index Methodology Guide**.

Calculation types

For information on the Index calculation types as well as the mathematical approach used to calculate the Index(es), please refer to the **Calculation Manual – Equities & Commodities**.

Recalculation and restatement policy

For information on the Recalculation and Restatement Policy, please refer to the **Nasdaq Index Recalculation Policy**.

Data sources

For information on data sources, please refer to the **Nasdaq Index Methodology Guide**.

Contact information

For any questions regarding an Index, please contact the Nasdaq Index Client Services team at indexservices@nasdaq.com.

Index dissemination

Index values and weightings information are available through Nasdaq Global Index Watch (GIW) website at <https://indexes.nasdaqomx.com/> as well as the Nasdaq Global Index FlexFile Delivery Service (GIFFD) and Global Index Dissemination Services (GIDS). Similar to the GIDS offerings, Genium Consolidated Feed (GCF) provides real-time Index values and weightings for the Nordic Indexes.

For more detailed information regarding Index Dissemination, see the **Nasdaq Index Methodology Guide**.

Index calculation and dissemination schedule

The Index is calculated during the trading day and is disseminated once per second from 10:00:10 to 18:35:00 local time (Eastern European Time or Eastern European Summer Time, dependent on the month of the year).

Website

For further information, please refer to Nasdaq GIW website at <https://indexes.nasdaqomx.com/>.

FTP and dissemination service

Index values and weightings are available via FTP on the Nasdaq Global Indexes FlexFile Delivery Service (GIFFD). Index values are available via Nasdaq's Global Index Dissemination Services (GIDS).

GOVERNANCE

Index governance

All Nasdaq Indexes follow the same governance structure. For a detailed list of this information, please see the **Nasdaq Index Methodology Guide**.

Nasdaq Index Management Committee

The Nasdaq Index Management Committee approves all new Index Methodologies. This committee is comprised of full-time professional members of Nasdaq. The committee meets regularly, and reviews items including, but not limited to, pending corporate actions that may affect Index constituents, statistics comparing the composition of the indexes to the market, companies that are being considered as candidates for addition to an Index, and any significant market events.

For a detailed overview of the Index Management Committee, please see the **Nasdaq Index Methodology Guide**.

Internal reviews of methodology

For a detailed description on internal reviews of the Methodology, please see the **Nasdaq Index Methodology Guide**.

Communication with stakeholders and consultations

For a detailed description on Consultations and Communications with Stakeholders, please see the **Nasdaq Index Methodology Guide**.

Index cessation

Nasdaq has a documented procedure that is followed for Index Cessation that includes termination/retirement of an Index or Index Family.

For more information, please refer to the **Nasdaq Index Cessation Policy**.

Discretionary adjustment

This Index Methodology was created by Nasdaq to achieve the aforementioned objective of measuring the underlying purpose of each Index governed by this methodology document. Any deviations from this methodology are made in the sole judgment and discretion of Nasdaq so that the Index continues to achieve its objective.

For more information on potential adjustments including Calculation and Pricing Disruptions, Expert Judgment, and Unexpected Reconstitution/Rebalances, please refer to the **Nasdaq Index Methodology Guide**.

GLOSSARY OF TERMS AS USED IN THIS DOCUMENT

For the glossary of key terms, please refer to the **Nasdaq Index Methodology Guide**.

DISCLAIMER

Nasdaq may, from time to time, exercise reasonable discretion as it deems appropriate in order to ensure Index integrity, including but not limited to, quantitative inclusion criteria. Nasdaq may also, due to special circumstances, if deemed essential, apply discretionary adjustments to ensure and maintain the high quality of the index construction and calculation. Nasdaq does not guarantee that any Index accurately reflects future market performance.
