

INDEX METHODOLOGY

## OMX STOCKHOLM 30 DIVIDEND POINT INDEX™

### OMXS30DVP

#### INDEX DESCRIPTION

The OMX Stockholm 30 Dividend Point Index is calculated as the running total of ordinary dividends paid by the constituents of the OMX Stockholm 30 Index, expressed in index points.

#### SECURITY ELIGIBILITY CRITERIA

##### Parent index

A security must be included in the OMX Stockholm 30 Index. Please refer to that methodology for further information.

##### Dividends

Dividends classified as Ordinary dividends according to Nasdaq's opinion are included in the Index calculation. Please refer to the "Dividends" section in **Corporate Actions and Events Manual - Nordic, Baltic, and SmartBeta Equities** for further information. An extraordinary dividend is a part of the calculation only through the adjusted Index Divisor.

#### INDEX CALENDAR

##### Reset schedule

The Index is reset to zero once a year in connection with the derivatives expiration in December.

##### Reset effective date

The Index value is reset to zero at market open on the first trading day after the third Friday in December, to coincide with the derivatives expiration. Consequently, the Index measures the total dividend points of the OMX Stockholm 30 Index since the previous reset date.

## INDEX OPERATION AND MAINTENANCE

### Index calculation formula

The Index follows a “Dividend Point” Index Calculation. See **Calculation Manual – Equities & Commodities** for further information.

### Index adjustments

Nasdaq may, in consultation with the Index Management Committee, make adjustments to the Index to ensure Index integrity.
