

INDEX METHODOLOGY

NASDAQ GLOBAL BUYBACK ACHIEVERS™ INDEX DRBG™

INDEX DESCRIPTION

The Nasdaq Global BuyBack Achievers™ Index (the “Index”) is comprised of securities from the Nasdaq US BuyBack Achievers™ Index (DRB™) and the Nasdaq International BuyBack Achievers™ Index (DRBXUS™). The Index is designed to track the performance of U.S. and international (excluding U.S.) securities from corporations that have effected a net reduction in shares outstanding of 5% or more in the trailing twelve months.

SECURITY ELIGIBILITY CRITERIA

To qualify for index inclusion, securities must meet the following Security Eligibility Criteria, which are applied as of the Reconstitution reference dates, unless stated otherwise.

Security universe

A security must be included in the Nasdaq US BuyBack Achievers Index (DRB) or in the Nasdaq International BuyBack Achievers Index (DRBXUS) as of the Reconstitution effective dates. Please refer to the methodologies of those indexes for information on their security eligibility criteria and constituent selection.

Market capitalization

A security included in the Nasdaq US BuyBack Achievers Index (DRB) must also have a market capitalization of at least \$500 million (USD).

Liquidity

A security included in the Nasdaq US BuyBack Achievers Index (DRB) must also have a three-month average daily value traded (ADVT) of at least \$2.5 million (USD).

Other eligibility criteria

If, at reconstitution, Nasdaq becomes aware that an issuer or security will soon undergo a fundamental change that makes it ineligible, Nasdaq will remove the security from consideration. This includes entering into a definitive merger or acquisition agreement or other pending arrangement that would make it ineligible for Index inclusion, or a filing of bankruptcy or similar protection from creditors, or other events as described in Section 3 of **Corporate Actions and Events Manual – Equities**.

CONSTITUENT SELECTION

Constituent selection process

A Reconstitution is conducted semiannually based on the Reconstitution reference dates.

All securities that meet the applicable Security Eligibility Criteria are included in the Index.

CONSTITUENT WEIGHTING

Constituent weighting scheme

The Index is a modified free float market capitalization-weighted index.

Constituent weighting process

A Rebalance is conducted quarterly based on the Rebalance reference dates.

Each Index Security's initial weight is determined by dividing the Index Security's free float market capitalization by the aggregate free float market capitalization of all Index Securities.

Initial Index Security weights are then iteratively adjusted to meet the following constraints:

- No single country's total weight may exceed 60% of the Index.
- No Index Security within the top 8 ranked securities by weight may exceed 5%.
- No Index Security outside the top 8 ranked securities by weight may exceed 2.5%.

The excess weight of any capped Index Security or country is redistributed proportionally across the remaining Index Securities. For additional information about index weighting, see **Nasdaq Index Weight Calculations**.

INDEX CALENDAR

Reconstitution & Rebalancing schedule

Reconstitution Frequency	Semiannually
Rebalance Frequency	Quarterly
Reconstitution Reference Dates	Last trading day in June and December, respectively
Reconstitution Announcement Dates	After the close on the sixth trading day prior to the Reconstitution effective dates
Reconstitution Effective Dates	At market open on the first trading day of August and February, respectively
Rebalance Reference Dates	Last trading day in March, June, September, and December, respectively
Rebalance Announcement Dates	After the close on the sixth trading day prior to the Rebalance effective dates
Rebalance Effective Dates	At market open on the first trading day of May, August, November, and February, respectively

Holiday schedules

The Indexes are calculated Monday through Friday and do not close for holidays, as they are Global Indexes.

Index calculation and dissemination schedules

The Indexes are calculated during the trading day and are disseminated once per second. The Indexes are calculated five (5) days a week, Monday through Friday, starting by the earliest time zone (Asia/Tokyo) and closing by the latest time zone (America/New York) in USD.

INDEX MAINTENANCE

Deletion policy

If, at any time other than an Index Reconstitution, Nasdaq determines that an Index Security has or will undergo a fundamental alteration that would make it ineligible for Index inclusion, the Index Security is removed as soon as practicable. Such alternations may include a merger, acquisition or other major corporate event that would otherwise adversely affect the integrity of the Index.

Replacement policy

Index securities deleted at any time during the year other than the Index Reconstitution(s) are not replaced.

Corporate actions

In the periods between scheduled index reconstitution and rebalancing events, individual index securities may be the subject to a variety of corporate actions and events that require maintenance and adjustments to the Index. The specific treatment of each type of corporate action or event is described in Nasdaq **Corporate Actions and Events Manual – Equities**, which is incorporated herein by reference.

In certain cases, corporate actions and events are handled according to the weighting scheme or other index construction techniques employed. Wherever alternate methods are described, the Index will follow the “Market Cap Corporate Action Method.”

Index share adjustments

Other than as a direct result of corporate actions, the Index does not normally experience share adjustments between scheduled Index Rebalance and Reconstitution events.

ADDITIONAL INFORMATION

Announcements

Nasdaq announces Index-related information via the Nasdaq Global Index Watch (GIW) website at <http://indexes.nasdaq.com>.

For more information on the general Index Announcement procedures, refer to the **Nasdaq Index Methodology Guide**.

Unexpected market closures

For information on Unexpected Market Closures, refer to the **Nasdaq Index Methodology Guide**.

Calculation types

For information on the Index calculation types as well as the mathematical approach used to calculate the Index(es), refer to the **Calculation Manual – Equities and Commodities**.

Recalculation and restatement policy

For information on the Recalculation and Restatement Policy, refer to the **Nasdaq Index Recalculation Policy**.

Data sources

For information on data sources, refer to the **Nasdaq Index Methodology Guide**.
